AB - J10130195 Preparation of carboxylic acids and their salts comprises:
oxidizing an organic cpd. having prim. hydroxyl gp. with oxidizing
agent of halogen gp. in the presence of hindered amine or N-halo
hindered amine.

- USE - Carboxylic acids and their salts obtd. by present method are
used as surfactants for detergents to shampoo, body shampoo,
detergents for tableware, vegetables, adornment clothing, and soaps.
- ADVANTAGE - Carboxylic acids can be produced economically in high
purities under mild conditions. They are low-irritating to skin and
have good foaming character.
- (Dwg.0/0)
